SECTION 5: Firefighting measures

Suitable extinguishing media

A fire in your laboratory involving this chemical should be extinguished with a dry chemical, carbon dioxide or halon extinguisher. (NTP, 1992)

Specific hazards arising from the chemical

Combustible. (NTP, 1992)

Special protective actions for fire-fighters

Wear self-contained breathing apparatus for firefighting if necessary.

SECTION 6: Accidental release measures

Personal precautions, protective equipment and emergency procedures

Avoid dust formation. Avoid breathing mist, gas or vapours. Avoid contacting with skin and eye. Use personal protective equipment. Wear chemical impermeable gloves. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Keep people away from and upwind of spill/leak.

Environmental precautions

Prevent further spillage or leakage if it is safe to do so. Do not let the chemical enter drains. Discharge into the environment must be avoided.

Methods and materials for containment and cleaning up

Treatability of wastewater pollutants, p-chlorophenyl phenyl ether, by solvent extraction is discussed.

SECTION 7: Handling and storage

Precautions for safe handling

Handling in a well ventilated place. Wear suitable protective clothing. Avoid contact with skin and eyes. Avoid formation of dust and aerosols. Use non-sparking tools. Prevent fire caused by electrostatic discharge steam.

Conditions for safe storage, including any incompatibilities

Store the container tightly closed in a dry, cool and well-ventilated place. Store apart from foodstuff containers or incompatible materials.

SECTION 8: Exposure controls/personal protection

Appropriate engineering controls

Ensure adequate ventilation. Handle in accordance with good industrial hygiene and safety practice. Set up emergency exits and the risk-elimination area.

Individual protection measures, such as personal protective equipment (PPE)

Eye/face protection

Wear tightly fitting safety goggles with side-shields conforming to EN 166(EU) or NIOSH (US).

Skin protection

Wear fire/flame resistant and impervious clothing. Handle with gloves. Gloves must be inspected prior to use. Wash and dry hands. The selected protective gloves have to satisfy the specifications of EU Directive 89/686/EEC and the standard EN 374 derived from it.

Respiratory protection

If the exposure limits are exceeded, irritation or other symptoms are experienced, use a full-face respirator.

Persistence and degradability

4-Chlorophenyl phenyl ether displayed a 62% theoretical biological oxygen demand in water (ten day test, conditions not given)(1). 4-Chlorophenyl phenyl ether was reported as undergoing 0% biodegradation in a five day test using settled domestic wastewater as an inoculum; biodegradation increased to 36% by the second subculture, and fell to 1% when using the third subculture(2,3). 4-Chlorophenyl phenyl ether was thus listed as being not significantly degraded under the conditions of the method, the lowest of a three tier rating system(3).

Bioaccumulative potential

A BCF of 736 was experimentally determined for 4-chlorophenyl phenyl ether in rainbow trout (*Salmo gairdneri*) (8.9 day experiment)(1).

Mobility in soil

Based on the log octanol/water partition coefficient (K_{ow}) of 4.08, and the water solubility, 3.3 ppm at 25 deg C(1), estimates for K_{oc} are in the range 2260-3950 for 4-chlorophenyl phenyl ether(2,3, SRC), suggesting slight mobility in soil(4, SRC).

Other adverse effects

no data available

SECTION 13: Disposal considerations

Disposal methods

Product

The material can be disposed of by removal to a licensed chemical destruction plant or by controlled incineration with flue gas scrubbing. Do not contaminate water, foodstuffs, feed or seed by storage or disposal. Do not discharge to sewer systems.

Contaminated packaging

Containers can be triply rinsed (or equivalent) and offered for recycling or reconditioning. Alternatively, the packaging can be punctured to make it unusable for other purposes and then be disposed of in a sanitary landfill. Controlled incineration with flue gas scrubbing is possible for combustible packaging materials.
