### **Persistence and degradability**

In Warburg respirometer tests, 9,10-dimethylanthracene (concentration of 500 mg/l) was not significantly biodegraded by activated sludge from three different treatment plants(1). 9,10-Dimethylanthracene reached 19.5% of its theoretical oxygen demand over a period 144 hours using activated sludge from a treatment plant receiving municipal waste(1). 9,10-Dimethylanthracene was not biodegraded by activated sludge obtained from a treatment plant receiving residential wastes only (1). 9,10-Dimethylanthracene reached 1.6% of its theoretical oxygen demand over a period of 144 hours using activated sludge from a treatment plant receiving combined domestic wastewater(1).

### **Bioaccumulative potential**

An estimated BCF of  $1.2 \times 10^4$  was calculated for 9,10-dimethylanthracene(SRC), using a measured log Kow of 5.69(1) and a recommended regression-derived equation(2). According to a classification scheme(3), this BCF suggests that bioconcentration in aquatic organisms is very high(SRC).

### **Mobility in soil**

The Koc of 9,10-dimethylanthracene is estimated as approximately  $3.0 \times 10^4$ (SRC), using a measured log Kow of 5.69(1) and a regression-derived equation(2,SRC). According to a recommended classification scheme(3), this estimated Koc value suggests that 9,10-dimethylanthracene is expected to be immobile in soil(SRC).

### **Other adverse effects**

no data available

## SECTION 13: Disposal considerations

### Disposal methods

#### Product

The material can be disposed of by removal to a licensed chemical destruction plant or by controlled incineration with flue gas scrubbing. Do not contaminate water, foodstuffs, feed or seed by storage or disposal. Do not discharge to sewer systems.

#### Contaminated packaging

Containers can be triply rinsed (or equivalent) and offered for recycling or reconditioning. Alternatively, the packaging can be punctured to make it unusable for other purposes and then be disposed of in a sanitary landfill. Controlled incineration with flue gas scrubbing is possible for combustible packaging materials.
