Special protective actions for fire-fighters

Wear self-contained breathing apparatus for firefighting if necessary.

SECTION 6: Accidental release measures

Personal precautions, protective equipment and emergency procedures

Avoid dust formation. Avoid breathing mist, gas or vapours. Avoid contacting with skin and eye. Use personal protective equipment. Wear chemical impermeable gloves. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Keep people away from and upwind of spill/leak.

Environmental precautions

Prevent further spillage or leakage if it is safe to do so. Do not let the chemical enter drains. Discharge into the environment must be avoided.

Methods and materials for containment and cleaning up

Collect and arrange disposal. Keep the chemical in suitable and closed containers for disposal. Remove all sources of ignition. Use spark-proof tools and explosion-proof equipment. Adhered or collected material should be promptly disposed of, in accordance with appropriate laws and regulations.

Bioaccumulative potential

Based upon a measured water solubility of 20,655 mg/L at 25 deg C(1), the BCF for isopropyl formate can be estimated to be about 2.3 from a recommended regression-derived equation(2,SRC) which suggests that bioconcentration in aquatic organisms is not an important fate process(SRC).

Mobility in soil

Based upon a measured water solubility of 20,655 mg/L at 25 deg C(1), the Koc for isopropyl formate can be estimated to be about 18 from a regression-derived equation(2,SRC). Using a structure estimation method based on molecular connectivity indexes, the Koc for isopropyl formate can be estimated to be 6(3,SRC). According to a suggested classification scheme(4), these estimated Koc values suggest that isopropyl formate is highly mobile in soil(SRC).

Other adverse effects

no data available

SECTION 13: Disposal considerations

Disposal methods

Product

The material can be disposed of by removal to a licensed chemical destruction plant or by controlled incineration with flue gas scrubbing. Do not contaminate water, foodstuffs, feed or seed by storage or disposal. Do not discharge to sewer systems.

Contaminated packaging

Containers can be triply rinsed (or equivalent) and offered for recycling or reconditioning. Alternatively, the packaging can be punctured to make it unusable for other purposes and then be disposed of in a sanitary landfill. Controlled incineration with flue gas scrubbing is possible for combustible packaging materials.
